VALIDMIND®

Modernizing AI Governance for Risk Leaders

Ensure scalable, compliant, and explainable oversight for every model—AI, GenAI, and beyond.

Overview

As AI and GenAI adoption accelerates, Chief Risk Officers (CROs) and Model Risk Officers face growing pressure to implement model governance frameworks that are aligned with regulatory requirements across jurisdictions, scalable, and ready for GenAI.

ValidMind was built to help financial services enable governance at scale, integrating seamlessly with AI model lifecycles and aligning with evolving global frameworks—from SR 11-7 and SS1/23 to NAIC and EU AI Act. With ValidMind, your existing teams will be able to govern more models, more consistently, and without compromising oversight or auditability.

Key Benefits

- Governance at scale
- Regulatory confidence
- Lifecycle oversight
- Reduce risk
- Automation-ready
- Audit-grade defensibility

Core Capabilities

Governance Workflows

Configurable, modularized governance templates and workflows with support for cross-functional roles to oversee traditional and GenAI models

Model Inventory

Fully flexible and customizable model inventory tracking across traditional and GenAI models—including foundational and downstream use cases

Validation Frameworks

300+ out-of-the-box tests and validation metrics, including for validating GenAI use cases

Compliance & Reporting

Assess compliance with SR 11-7, SS1/23, E23, and NIST frameworks using traceable evidence, findings history, and audit-ready risk dashboards

Automated Documentation

Generate model documentation and validation reports aligned with regulatory requirements and internal compliance standards

VALIDMIND®

Future-Proof Governance for an AI-Driven World

AI and GenAI are reshaping how financial institutions operate—but they also introduce new layers of regulatory complexity and risk. ValidMind equips CROs and governance leaders with the infrastructure to stay ahead of evolving standards, scale oversight across use cases, and confidently defend decisions in front of regulators, boards, and customers. It's not just about compliance—it's about trust.

About ValidMind

ValidMind is the model and AI risk management platform purpose-built for financial institutions. We help banks govern, validate, and monitor AI, GenAI, and traditional models at scale. By automating testing, documentation, and compliance workflows, ValidMind enables faster model deployment, audit ready oversight, and leaner model governance. Unlike fragmented toolsets or manual validation processes, ValidMind provides a centralized system of record—empowering institutions to move fast, manage risk, and stay ahead of evolving regulation.

Features

- Automated documentation templates
- Validation automation
- Workflows
- Regulatory alignment checks
- Inventory management
- Dashboards & analytics
- Pre-configured environments for regulatory landscapes
- Out-of-the-box testing + your own

Why ValidMind for AI Governance?

Eliminate Governance Silos

Brings AI, model risk, and compliance teams together via structured workflows

Automate Manual Documentation

Automates control reporting and model documentation

Enable Proactive Oversight

Proactive alerts, dashboards, and risk monitoring by design

Address Regulatory Fragmentation

Out-of-the-box support for SR 11-7, SS1/23, E23, EU AI Act, and more
