

Model Risk Management Automation

Automate model documentation and validation workflows to accelerate approvals, reduce risk, and ensure regulatory readiness.

Overview

ValidMind's Automation capability eliminates manual, repetitive model documentation and validation tasks, freeing up MRM teams and validators to focus on what matters.

Built for banks, credit unions, and highly regulated enterprises, ValidMind automates key artifacts and workflows, reduces approval timelines, and ensures consistency and auditability at scale.

Key Benefits

- Accelerate model approvals
- Eliminate manual rework
- Standardize validation reports
- Support regulatory reviews
- Empower lean teams
- Ensure consistency across models

Core Capabilities

Automated Documentation

GenAI-assisted creation of validation reports, regulatory deliverables, and audit-ready documentation

Validation Workflows

Route models through pre-configured validation workflows, including testing, peer review, and sign-off checkpoints

Regulatory Checks

Export audit-ready documentation aligned to internal templates and regulatory requirements (e.g., SR 11-7, E23, SS1/23)

Validator Toolkits

Equip validators and SMEs with pre-built testing frameworks, documentation templates, and dashboards in one place

Centralized Governance

Track status, version history, rationale, and reviews in one connected system, ensuring consistency across all models

Accelerate Approvals. Standardize Quality.

Manual validation and documentation slow down AI adoption and introduce risk. ValidMind automates these steps with intelligent workflows, customizable templates, and compliance-ready outputs. Go from model development to deployment faster, without compromising quality or control.

About ValidMind

ValidMind is the model and AI risk management platform purpose-built for financial institutions. We help banks govern, validate, and monitor AI, GenAI, and traditional models at scale. By automating testing, documentation, and compliance workflows, ValidMind enables faster model deployment, audit ready oversight, and leaner model governance. Unlike fragmented toolsets or manual validation processes, ValidMind provides a centralized system of record—empowering institutions to move fast, manage risk, and stay ahead of evolving regulation.

Features

- GenAI documentation
- One-click PDF exports
- Regulatory templates
- Reviewer workflows
- Peer review sign-offs
- Self-service validator toolkits
- Audit-ready reports
- Version history tracking

Why ValidMind?

Purpose-Built for MRM & AI Risk

Designed for regulated institutions; not retrofitted GRC or dev tools.

Built-In Regulatory Alignment

Pre-loaded with frameworks for SR 11-7, E23, SS1/23, and the EU AI Act.

Designed for Risk Teams

Built by MRM and governance pros with risk organizations in mind.

Future-Proofed for Change

ValidMind adapts with the AI landscape using AI to keep pace with AI.
