# AI GOVERNANCE TEAMING

Human + AI teaming is the collaboration of human judgment with AI automation. For MRM professionals, teaming is essential to scale oversight, meet regulatory expectations, and manage the growing complexity of AI models.
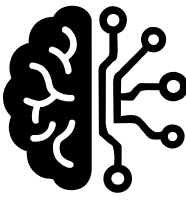

WHY TEAMING MATTERS

Explosion of AI models

Rising regulatory expectations

AI requires more oversight

HUMAN ROLES

- 01 Context and judgment
- 02 Interpret regulations
- 03 Effective challenge
- 04 Accountability

AI ROLES

- 01 Automated documentation
- 02 Continuous monitoring
- 03 Pattern detection
- 04 Lifecycle integration

HUMAN + AI TEAMING ACROSS THE MODEL LIFECYCLE

	Development	Validation	Production
AI	Policy checks, alerts, documentation	Documentation, policy checks, testing	Continuous monitoring & alerts
Human	1st line testing, insights	Effective challenge and approval	Human-in-the-loop feedback, reporting

OUTCOMES

- ✓ Scalable compliance
- ✓ Faster risk identification
- ✓ Higher model quality
- ✓ Regulatory alignment

HUMAN + AI TEAMING ENABLES MRM TO KEEP PACE WITH AI AT SCALE
